

NATURAL

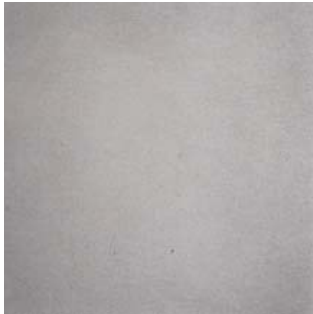

*Note: Pitted plate is a *Premium Finish* and is subject to availability.

Pitted plate and Mill plate textures are created by nature and shall therefore be somewhat unpredictable in terms of intensity of texture or pattern.

The mirror-finish of 'Mirror Polished Stainless' (not shown, please see the Intersect Bench and Console) cannot be easily represented here. Please contact a showroom representative to view a sample.

SMOKE

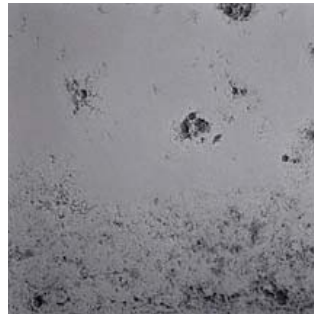

Please Note:

These images are intended to show textures and color tones for standard finishes in the collection. Because photo reproductions can vary, we cannot guarantee an accurate color match to what is shown here. Please contact one of the showroom representatives for physical samples to confirm textures, patterns, and colors of our finishes.

We blacken steel by a chemical process that is affected by the inherent properties of the steel and its unique surface texture that comes from the way in which it is produced. Please note that exposure to the air and light can also cause the tone of these finishes to change (usually darken slightly) over time. Subtle changes in tone within our strict tolerances shall be allowed.
